KOTLINX HOTMILDS

```
//omitted imports
fun main() {
    System.out.appendHTML().html {
        head {
            meta {
                title = "Generated in Kotlin"
            }
        }
        body {
            div {
                a(href = "https://kotlinlang.org") {
                    target = ATarget.blank
                    +"Main site"
                }
            }
        }
    }
}
}
```

```
operator fun String.unaryPlus(): Unit {  
    text(this)  
}
```

```
//omitted imports
fun main() {
    System.out.appendHTML().html {
        head {
            meta {
                title = "Generated in Kotlin"
            }
        }
        body {
            div {
                a(href = "https://kotlinlang.org") {
                    target = ATarget.blank
                    +"Main site"
                }
            }
        }
    }
}
```

## KOTLINX HTML DSL

---

```
//omitted imports
fun main() {
    System.out.appendHTML().html {
        head {
            meta {
                title = "Generated in Kotlin"
            }
        }
        body {

            div {
                a(href = "https://kotlinlang.org") {
                    target = ATarget.blank
                    +"Main site"
                }
            }
        }
    }
}
```
